

Calf Feeders

DRY FEEDERS FOR CALVES WEIGHING UP TO 450 KG

The Domino line of calf feeders ensures easy access to feed and minimum feed waste. Ad lib feeding ensures a natural and calm environment in the pen and contributes to improved growth through optimal absorption of the feed. The design of the feeders ensures that the feed falls into the trough as the animal eats, thus preventing feed waste.

The Domino calf feeders are also noted for the following:

- Strong materials, PE plastics and steel
- Steel section reinforced edges
- No sharp edges that can harm the animals
- Easy to clean
- Supplied fully assembled and ready for installation
- Multiple feed amount settings ensuring minimum feed waste
